The Associate of Science in Information Systems Development (AScISD) organized a BBQ Gathering Activity on 24 January 2013 (Thursday) for students to share their experience on learning and articulation. This gathering was well-received in which over 40 ISD students (36 from year 1 and 8 from year 2) participated.

The Programme Leader of AScISD, Dr. Desmond Tsoi, and the Programme Leader of Associate of Science in Network and Systems Administration, Dr. Timothy Kwong were invited to share about various articulation pathways for sub-degree graduates.

Apart from this, student participants exchanged their learning experience in CCCU and most students found that this really helped them to identify the strengths and weaknesses of their current learning approach. By appreciating the approach adopted by their peers, we believe that students could enhance their academic performance in the upcoming period staying with CCCU. Finally, year 2 students took initiative to share their experience on how to identify possible articulation opportunities for their further study.

We acknowledge that this event is sponsored by the Local Co-curricular Activity Fund offered by CCCU.
