Alumni Sharing on Non-JUPAS Application & Study for Year 2013

The Division of Applied Science and Technology has organized an alumni sharing session for students on October 25, 2013. The aim of this activity is to help students get a better picture on non-JUPAS applications, ranging from the procedure to tips for having a successful interview. The session was well-received by 35 students\(^*\) from different programmes.

On that day, Dr. Desmond Tsoi, the Programme Leader of Associate of Science in Information Systems Development, commenced the session by giving a warm welcome speech to alumni and participants. After that, the invited alumni shared their experience and comments on the following items:

1. The procedure of non-JUPAS applications.
2. Interview preparation and techniques.
3. Latest credit transfer mechanisms of different UGC institutes under the 3-3-4 system.
4. The keys to sail through the upcoming journey of further study.

The atmosphere of the session was good and participants were all appreciated the sharing given by our alumni. Many of them expressed that the sharing was very useful. The session was concluded by photographs and light refreshment.

\(^*\) No. of students from each programme:
